ABOUT US

Stazione Parenzana is a brewery based on experience, knowledge and ideas. Beer is produced according to the classic method with the latest equipment, which provides better control of the natural process of beer clarification. This principle allows us more choice in regulating the taste and aroma of beer and ensures that the beer stays natural. We control the ideal conditions for the action of enzymes and yeast, but we refuse filtration and pasteurization in beer production.

In our brewery, we strive to try new beers, both classic and special.

For us, making beer is more than just work. It is a rich and complex world of tastes and feelings related to food, history and culture and the transmission of it and its development. The result is our beer.
